Ground Status and Application Procedure

This booklet contains listed details of all current prospecting and mining facilities. Details include the names of the licensees, the geographical location and, with reference to prospecting licences, the details of the minerals for which they have been issued. The locations of these prospecting licences and mining facilities, as well as ground that is available for application is available in an online facility maintained by this Department and accessible at <http://www.mineralsireland.ie/OnlineServices>.

Available Ground

Ground that is available for exploration under a Prospecting Licence (PL) is available online through [online GIS viewer](#)

1. Ground Categories

- a. **Open areas (Green/Pale Green):** Established licence areas available for application at any time are identified by their number. Those areas coloured pale green attract exploration incentives (see Incentive Areas below).
- b. **Held areas (Red):** Current prospecting licences and recently offered licences are restricted to certain minerals (p.10-25). Such ground is available for application for prospecting for other minerals.
- c. **Competition areas (Yellow):** Available Prospecting Licence areas for this competition are listed on page 9.

2. Prospecting Licence Terms

A prospecting licence typically covers an area of 35 km². Prospecting licences are issued for a period of six years (maximum) for specified minerals and can be renewed. A minimum expenditure per licence is required which varies with the age of the licence (see table below). A minimum work programme is also required, details of which are agreed with the licensee. Progressively increased work and expenditure commitments are required on renewal. Work reports are required every two years, and are held confidential for six years thereafter, or

until expiry or surrender of the licence. Third party insurance, indemnifying the Minister, is required for the period of the licence.

3. Incentive Areas

Significant financial incentives are available for the first six years of exploration on relatively neglected areas or areas where current exploration is restricted to certain minerals. The incentives consist of substantially reduced fees and expenditure requirements. They are designed to provide scope for relatively inexpensive "grass roots" exploration in order to encourage work in areas where results of earlier exploration had failed to produce sufficient encouragement to the licensee.

The incentives apply to two categories of ground:

- a. **Open areas** where these Prospecting Licence areas have been available for application for more than four years.
- b. **Areas currently licensed for certain minerals**, but available for exploration for other minerals. Currently licensed areas for which exploration may be undertaken for other minerals are listed on pages 10-25.

Open Areas available for more than four years: Where a previously issued Prospecting Licence area has been available for application for at least four years, the licence will be granted, normally, for a term of six years. A reduced fee of €1,250 per Prospecting Licence will apply, payable in advance for each two-year phase as €375 for each of the first and second phases, and €500 for the third phase. This represents a reduction of €1,875 (60%) in fees compared to the standard requirements. (There is no reduction in the application fee).

Currently Licensed Areas: Ground is also available to companies that wish to undertake exploration over areas currently held, for minerals that are not assigned to the current prospecting licence holder. Such additional prospecting licences will only be issued where the Minister for Environment, Climate and Communications is satisfied that there will be no clash of mineral interests. The current prospecting licence holder continues to hold a standing Statement of Interest for all other minerals in that area. The fees and expenditure

—

requirements will be the same as for prospecting licences that have been available for over four years i.e. the 'Open Areas' Incentive category (see above).

Fees	Competition / Standard Areas	Incentive Areas
First 2 years	€750	€375
Second 2 years	€875	€375
Third 2 years	€1,500	€500
TOTAL	€3,125	€1,250
Minimum Expenditure Requirements		
First 2 years	€10,000	€2,500
Second 2 years	€15,000	€5,000
Third 2 years	€20,000	€10,000
TOTAL	€45,000	€17,500

Ground Unavailable

Ground unavailable for application is differentiated as follows:

- Licences under application, and that have been offered to the applicant
- Licence areas that are currently not being made available for application
- Licences that have been applied for under earlier competition
- Excluded areas e.g. National Parks: These are areas that are not available for application at any time.
- Current Prospecting Licences for certain minerals, Mining Leases, Mining Licences and Mining Permissions

Application Procedures

While applications are invited for all categories of available ground, it should be understood that an area may have been already applied for, and that applications are treated on a time-priority basis i.e. "first come, first served". Before making an application for any open area, prospective applicants may wish to consult with the Geoscience Regulation Office to ascertain whether there has been a prior application for the area. If there has been a prior application, and if a licence has been offered, the ground is not available for further applications. The acceptance of an application for a Prospecting Licence does not create any obligation on the part of the Minister to grant a licence.

Where there is a valid Statement of Interest over ground that is being applied for, the applicant will be so notified (but no other details provided) and invited to revise their application if they wish to do so.

Applicants are reminded that, if more than one area is applied for, a priority listing of the applications is required, otherwise all applications will be regarded as having equal priority. If separate applications are made over a period of time, the priorities should also take account of any earlier applications. It should be noted that where expenditure proposals are above the minimum required (e.g. in a Competition), these will be taken as the minimum expenditure requirement when the ground is offered to the successful applicant.

All applications for prospecting licences must be made using Form 1 (Application Form), accompanied by a fee of **€190.00 per Prospecting Licence Area**.

The form is available to download at

<https://www.gov.ie/en/service/apply-for-a-prospecting-licence/> and

[Forms \(mineralsireland.ie\)](https://www.mineralsireland.ie/forms)

Applications may be made to GSRO@decc.gov.ie or by post to:

Geoscience Regulation Office

Department of the Environment, Climate and Communications

29/31 Adelaide Road

Dublin D02 X285

Payments to the Department of the Environment Climate and Communications

The Department can accept payment by Electronic Fund Transfer (EFT) only. Each payment **must** quote your 5-digit customer number. For assistance or for first time applicants please contact GSRO directly.

Each payment must be followed by remittance notice detailing

1. Name and address
2. Your 5 digit customer number (e.g. 12345)
3. The date and amount paid into the Department's EFT Account
4. A listing of the specific Department invoice number(s) to which the payment refers.
5. Where no invoice has issued a detailed description of purpose of the payment.

The remittance notice can be sent to AccountsReceivable@DECC.gov.ie or by mail to Accounts Receivable, Department of the Environment, Climate and Communications, Elm House, Earlsvale Road, Cavan, H12 A8H7.

All payments are to be made in Euro. Applicants should be aware that bank charges can apply, particularly when applying from overseas. Provision should be made for these charges by the applicant to ensure the full amount is received in the Department's account. Failure to do so will lead to delays in applications being accepted.

Bank Details	Danske Bank
Account Name	Department of the Environment, Climate and Communications Accounts Receivable
Account No.	0000 1058
Bank Sort Code	95 15 99
IBAN	IE31 DABA 9515 9900 0010 58
BIC	DABAIE2D

The Department cannot accept any responsibility for payments that cannot be identified due to lack of information. Should you have any queries please contact Accounts Receivable at (01) 678 2000.

Prospecting Licence Competition

Procedures

Every three months, a Competition is held for certain Prospecting Licence areas. The competition relates to areas for which licences have been surrendered or terminated, or that have been offered but declined, in the previous three months. Previously unavailable ground may also be released through competition. Interested parties normally have two months in which to apply for a licence over a competition area, with all applications received during that period deemed to have been received at the same time i.e. no time priority is given to applications received during those months.

It should be noted that no reduction in financial commitment by aggregating expenditure from contiguous areas will be accepted for the first two-year phase for any licence area awarded under competition.

Prospecting licences available for application under Competition will be published usually on the 1st February, 1st May, 1st August and 1st November of each year. They consist of a list of prospecting licence areas that have become available for application under equal competition, together with details of how to apply, and a listing of prospecting licences issued or offered and advertised since the previous publication.

Maps and information on currently held Prospecting Licence areas are available through <https://www.gov.ie/en/service/2f592-map-viewer/>. Updates to competitions are available on our competition page at <http://www.mineralsireland.ie/ExplorationLicensingProcess/ProspectingLicenceCompetitions.htm>.

Prospecting Licence Areas Open for Application under Competition

Evaluation of Applications - 1 November 2021

1. In order that interested parties have an equal chance of applying for newly available ground, four times yearly (on 1 February, 1 May, 1 August and 1 November) a Competition list is published of licence areas that have been:
 - i. recently surrendered,
 - ii. offered to competitors but not accepted or
 - iii. made open for application following a period of non-availability.

Applications made in the following two months will then be considered on their respective merits, without any regard to time priority. A technical evaluation team will evaluate the candidate companies' applications against the following (weighted) criteria.

Criteria		Marks
Quality of exploration programme:		45
Proposed exploration expenditure	20	
Coherence/Applicability/Comprehensiveness	15	
Dynamic nature of the programme (i.e. tempo of work programme)	10	
Availability of funds		15
Funds at hand	10	
Funds that can be made available	5	
Applicant track record, experience of applicants and the quality of their previous work.		20
Proximity of ground to PLAs held by the applicant (where relevant)		5
Quality of PL application		15
Total		100

2. The licence(s) will be offered to the successful applicant. Should the successful applicant choose to decline the licence offer, the licence(s) will then be offered to the next best qualified applicant.

3. The licensee will be required to fully meet the expenditure commitments and work programme stipulated in their successful application.

Further details concerning the individual State Mining Facilities (minerals, royalties, etc.) are published in the Six Monthly Report to the Oireachtas by the Minister for Environment, Climate and Communications in accordance with the Minerals Development Acts, 1940-1999. Six Monthly Reports are available at <http://www.mineralsireland.ie/LegislationFeesAndPolicy/SixMonthlyReports.htm>

Prospecting Licences Held Since 1st August 2021

All prospecting licences are restricted to certain minerals and hence the PL areas in question are available for application for other minerals (although the current holder is deemed to have a standing Statement of Interest for all these other minerals). The licensed minerals are abbreviated as follows: Base metals (Bm); Barytes (b); Gold, Ores of (g); Silver, Ores of (s); Platinum Group Elements, Ores of (PGE), Rare Earth Elements, Ores of (REE); Molybdenum, Ores of (Mo); Beryllium, Ores of (Be); Cs, Ores of (Cs); Lithium, Ores of (Li); Niobium, Ores of (Nb); Rubidium, Ores of (Rb); Tantalum, Ores of (Ta); Tin, Ores of (Sn); Tungsten, Ores of (W); Manganese, Ores of (Mn); Cobalt, Ores of (Co); Iron, Ores of (Fe).

There are 423 Licences held on 1st November 2021.

Ireland: Exploration & Mining News

1st November 2021

Mining Highlights

Mine Operations

There are currently two operating mines in Ireland (Figure 1): Navan (zinc-lead) and Drummond /Knocknacran (gypsum).

2021 Half Yearly (Jan-June) Mine Production

- Zinc metal in concentrates: 60kt (Equivalent figure for H1, 2020 was 59kt)
- Lead metal in concentrates: 7kt (Equivalent figure for H1, 2020 was 6.5kt)

2021 Half Yearly (Jan-June) Mine Output (Metal Content)

(a) Zinc

- Ireland produced 11.0% of European zinc mine output in H1, 2021 (4th in Europe)
- Ireland produced 1.0% of World zinc mine output in H1, 2021 (18th in World)

(b) Lead

- Ireland produced 2.8% of European lead mine output in H1, 2021 (9th in Europe)
- Ireland produced 0.3% of World lead mine output in H1, 2021

Source of Production Data: International Lead & Zinc Study Group

Mining

In the first half of 2021, the Navan underground zinc-lead mine accounted for 11.0% percent of European zinc mine output (16% of EU27 production) and 2.8% of European lead mine output (7% of EU27 production). Output from the mine also amounted to 1.0% of world mine production for zinc and 0.3% for lead. According to data published by the International Lead and Zinc Study Group, in the first half of 2021, Ireland ranked 18th in the world in relation to zinc mine output. Ireland currently places fourth in Europe, behind the Russian Federation, Sweden and Portugal in terms of European mine production for zinc.

Boliden Tara Mines DAC operation at **Navan**, Co. Meath, is the largest zinc mine in Europe. In the first half of 2021, the mine milled 1.15Mt of ore grading 5.48% Zn and 0.98% Pb. Since mining operations commenced in 1977, up until 30 June 2021, total production at Navan has amounted to 100.71Mt grading 7.70% Zn and 1.74% Pb. At the end of 2020, the mine's ore reserves (proven and probable), reported in accordance with the PERC Standard, stood at 18.1Mt grading 5.5% Zn and 1.5% Pb, whilst mineral resources (measured, indicated and inferred) were 35.1Mt at 7.7% Zn and 1.6% Pb ([Boliden](#)

[Summary Report, Resources and Reserves 2020](#), Tara Mine). The latter figure includes an inferred resource of 26.2Mt grading 8.4% Zn and 1.6% Pb for the 'Tara Deep' satellite deposit, which occurs approximately 1km southeast of the main mine at a depth of 1-2km.

Irish Gypsum Ltd., a subsidiary of French multi-national Saint Gobain, cumulatively produced approximately 150kt of gypsum in 2020 from its underground (**Drummond**) and open pit (**Knocknacran**) operations in Co. Monaghan. The gypsum is crushed and blended on site, before being transported by road to a production facility at the nearby town of Kingscourt for manufacturing plaster and plasterboard. A smaller tonnage of gypsum is additionally used in the manufacture of cement.

Exploration Highlights

Number of Current Prospecting Licences (PLs):	423
Number of Companies holding Prospecting Licences:	41
Percentage of Ireland Land Area under Licence:	Approx. 21%
Total Exploration Expenditure in 2020:	€23.61 Million
Exploration Expenditure on PLs in 2020:	€20.28 Million
Exploration Expenditure on State Mining Facilities in 2020:	€3.33 Million
2020 Drilling on PLs (non-mine related):	Approx. 40,300 metres.

Exploration Activity

As of 28th October 2021, forty one corporate entities held a total of 423 Prospecting Licences (PLs). The largest licence holders are Raptor Resources Ltd, Boliden Tara Mines Ltd, Teck Ireland Ltd, Adventus Zinc Ireland Ltd and Group Eleven Mining and Exploration Ltd. Over 50 Prospecting Licence applications are presently being processed. Since 1st May 2021, 4 licences have been issued (all to Boliden Tara Mines Ltd in Co. Galway).

Zinc and lead remain the principal commodities of exploration interest in Ireland. Other commodities that are currently being sought in Ireland include: gold, silver, copper, lithium, barite, PGEs and antimony.

Raptor Resources Ltd, a 100% owned subsidiary of Australian explorer **Zinc of Ireland NL**, continues to be the largest licence holder in Ireland. Raptor presently holds a total of 65 licence areas, many of which are located along the length of the Rathdowney Trend.

Group Eleven Mining and Exploration Ltd has commenced additional drilling at its **Carrickittle** prospect, where in mid 2020 it announced an intersection of 10.30m grading 14.6% zinc, 5.0% lead

and 43 g/t silver in drillhole G11-2840-04. The company has also drilled another hole at **Ballywire**, 10km southeast of Carrickittle, which is situated at the intersection of the Rathdowney Trend and the 'Pallas Green corridor'. This hole (G11-468-01) intersected 3.30m grading 10.1% zinc, 2.4% lead and 48.3 g/t silver at a depth of 312m. In addition, the company has recently announced the results of a drillhole at its **Denison** (Aherlow) prospect in Co. Limerick, which was drilled in an area of historically known mineralization. This hole intersected a wide interval of copper mineralization (116.7m grading 0.38% copper and 21 g/t, including 44.7m at 0.82% copper and 47 g/t silver).

Adventus Zinc Ireland Ltd (AZIL) has been drilling targets on its Kingscourt Block within the Moynalty Basin. This work is being undertaken under an earn-in agreement with a wholly owned subsidiary of **South32 Limited**. The latter company has a right to acquire a 70% interest in AZIL's Kingscourt, Rathkeale and Fermoy blocks. A total of 4,500m of drilling has been planned for the Kingscourt Block targeting Pale Bed-hosted, Irish-type zinc-lead deposits.

Conroy Gold and Natural Resources plc (Conroy) has completed due diligence drilling on its **Clontibret** gold deposit in Co. Monaghan. Conroy has signed a Letter of Intent with Demir Export A.S. for a planned Joint Venture (JV) on an earn-in basis over the 12 licences held by Conroy in the Longford Down Massif. The primary focus of the JV project is to develop the Clontibret deposit to construction ready status and then bring it into operation as a gold mine. The due diligence drilling undertaken at Clontibret is part of the overall process leading to the finalisation of definitive documentation, including the final JV agreement.

Arkle Resources Plc commenced an initial 1000m drilling programme in late April 2021 at its Mine River Project in Counties Wicklow and Wexford. Three holes have been drilled at Tombreen West, where previous trenching intersected visible gold within a 25cm vein. The initial hole intersected gold in five intervals including 1.8m grading 4.69 g/t from 12.6m depth. Other holes have been drilled along strike from the main **Tombreen** target area, where Arkle previously identified 8m @ 4.5 g/t gold. One of the recent drillholes returned a high grade intercept of 2.5m (36.5 – 39.0m) grading 12.13 g/t gold including 0.5m grading 51.6 g/t gold. The positive results have led to an extension of the drilling programme and the company is additionally proposing to undertake further trenching work in a number of areas of interest.

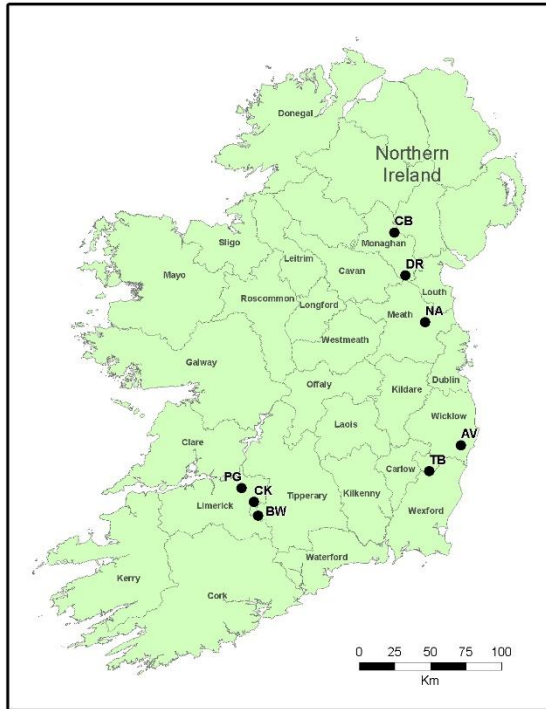

Figure 1: County Map of Ireland showing locations mentioned in text.

| PG | Pallas Green |
| TB | Tombreen |

IMC Exploration Group Plc is drilling four holes at West Avoca in a 1000m drilling programme. The holes are being drilled to assess the extent and continuity of copper, gold, lead and zinc mineralization along strike from the historic **Avoca** Mine. The first hole (21-2850-01) commenced drilling in August and was a down-dip step out of 40m from the nearest historical drillhole which had previously intersected 9m grading 10.3% Zn and 4.8% Pb. The new drillhole intersected 18.7m (158.7 – 177.4m) of mineralization grading 4.7% Zn and 1.8% Pb, including an interval of 2.8m grading 9.3% Zn and 3.3% Pb. A deeper 13m wide intercept (193.4 – 206.4m) assayed 1.6% Zn+Pb. Both the upper and lower intervals of mineralization returned a gold grade of 0.1 g/t over their respective widths (best intercept of 0.43m grading 0.64 g/t Au).

Exploration and Mining Expenditures 2020

Based on figures provided by exploration and mining companies, expenditure during the calendar year 2020 totalled €23.61 million (excluding office overheads). This is over €6 million higher than the 2019 figure of €17.53 million. The expenditure of €23.61 million is comprised of €20.28 million in Prospecting Licence Areas (“greenfield” exploration) and €3.33 million in areas covered by State Mining Facilities (SMF, “brownfield” exploration). Expenditure on drilling on PLs in 2020 amounted to €7.52M, which was lower than the equivalent figure for 2019 (€9.33M).

The expenditure in PL Areas is mainly related to base metal exploration (€19.88M), with lesser amounts being spent on gold (€172k) and other minerals (€227k).

Drilling statistics

Preliminary figures provided by Prospecting Licence holders indicate that a total of 40,302 metres of drilling (non mine-related) was carried out during 2020, mainly for base metals (zinc, lead).

Re-Structuring of Geoscience Functions within DECC

The Department of the Environment, Climate and Communications (DECC) has restructured its Geoscience functions with effect from 1st January 2021. The regulatory, licencing, compliance and enforcement roles formerly held by the Petroleum Affairs (PA) Division and Exploration and Mining (EM) Division have transferred to a new dedicated Geoscience Regulation Office (GSRO) within DECC, headed up by Clare Morgan. Simultaneously, the policy, legislative and promotional functions that previously resided within the PA and EM Divisions moved to a new Geoscience Policy Division (GSPD), also within DECC, led by Eoin Deegan. The new arrangement ensures that there is a clear divide between policy/legislation functions and regulation/monitoring functions.

Licensees are reminded that all correspondence and documentation relating to Prospecting Licences should now be emailed to GSRO@decc.gov.ie.

Prospecting Licences (PLs)				
Activity	Base Metals	Gold	Other	Total
Geology	€2,057,331.00	€85,019.00	€5,000.00	€2,147,350.00

Appendices

Publicly Available Prospecting Licence Area Data

Online Data Availability

Since mid-2003, the Exploration and Mining Division, now Geoscience Regulation Office, has been progressively providing publicly available company exploration data released since 1st January 2000 on the www.MineralsIreland.ie website. Data relating to over 1700 PL areas, including those in the current PL competition, are now available.
